Algorithm

Data Communication

Theory Of

Computation

Projects

MAY,2020 **Watch Rental App**

Users can rent a watch for a few days. They have to select a particular watch or they can add watches to the cart and check the availability of those watches between the selected dates. If the watches are available then users can place their order. While looking for watches they can also read the reviews.

Features: Login page, filters, product details, add to cart option, viewing order status, checking the availability of watch between selected dates, cancellation of an order(within 30 minutes of order), writing a review.

Technologies: Django, HTML, Bootstrap, Javascript

Github Link: https://github.com/vkonde21/watch_rental_app.

OCT,2019 **Linux Sort Command**

This command can be used to sort files of any size i.e files having a size greater than RAM. Since the whole file cannot be sorted in the RAM, external sorting algorithm is used.

Data Structure: Heap, Arrays

Language: C

Github Link: <https://github.com/vkonde21/DSA>.
